

CSS Flexbox

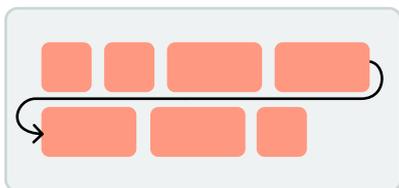

CSS properties meant to be set on the container (parent element, known as “flex container”)

flex-direction

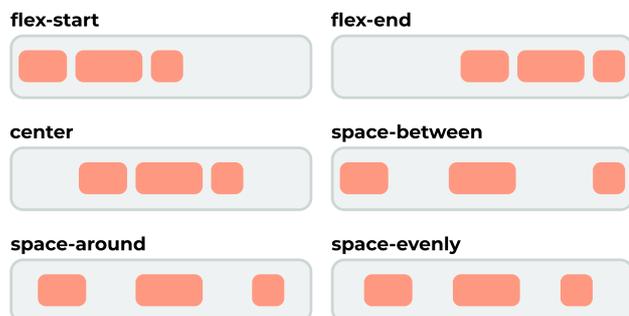

```
.container {  
  flex-direction: row | row-reverse  
  | column | column-reverse;  
}
```

flex-wrap

```
.container {  
  flex-wrap: nowrap | wrap |  
  wrap-reverse;  
}
```

justify-content

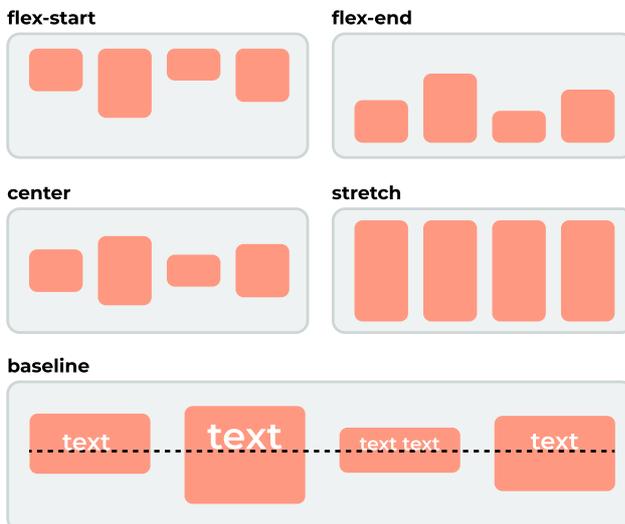

```
.container {  
  justify-content: flex-start | flex-end  
  | center | space-between |  
  space-around | space-evenly;  
}
```

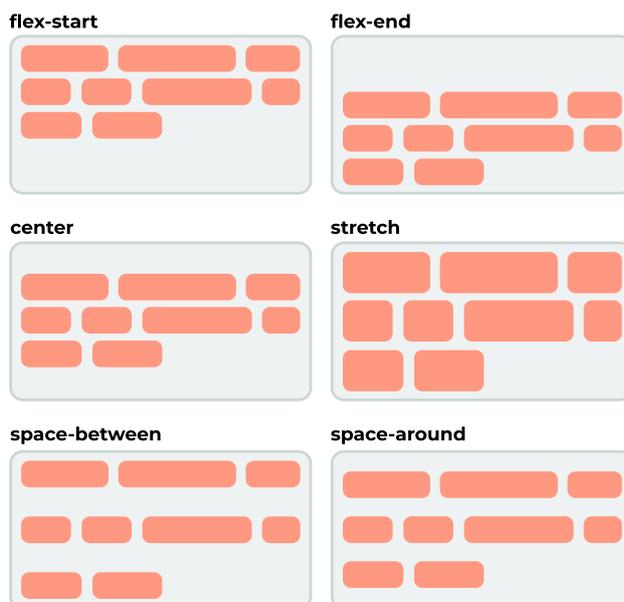

```
.container {  
  display: flex;  
}
```

align-items

```
.container {  
  align-items: flex-start | flex-end  
  | center | stretch | baseline;  
}
```

align-content

```
.container {  
  align-content: flex-start | flex-end  
  | center | stretch | space-between  
  | space-around;  
}
```
